Glass Scrapers & Blades

Quality Tools for Smart Cleaning™

Expert Tips – How Professionals Scrape

- Check if glass is scratch-resistant and suitable for scraper use. Unsuitable glass surfaces include: plexiglass, crown glass, solar glass and safety glass (ESG).
- Always follow the manufacturer's instructions.
- Perform a scrape test in advance on a small section.
- Before starting, check the glass for any damage and report it, if necessary.
- Check the blade for damage and change it or reverse it.
- The surface to be scraped should always be wet.
- It is best to use a releasing agent, such as "EasyGlideGlassCleaner."
- Scrape in one direction. Never pull the scraper back as this may cause scratches.

- Spay cleaning solution onto sleeve with the **SprayerOnABelt.**

Unger Griddle Cleaning

5 Steps for Cleaning

Step 1 - Loosen Food

- Loosen cooked-on foods and oils by scraping the griddle surface with the **ErgoTec® Long Handle** or **Short Handle Grill Scraper.**
- Scraping at a low angle will remove the greatest amount of cooked-on foods, and will protect the griddle surface from blade nicks and scratches.

Step 2 - Remove Loose Food

- Remove loose foods and oil from the griddle surface using the **Griddle High Heat Squeegee.**
- Scrape excess food and oil into the grease trap at the front corner of the griddle.

Step 3 - Clean Griddle

- Lower the griddle temperature, as recommended by the equipment manufacturer or cleaning chemical manufacturer.
- Apply grill cleaner or liquid degreaser to entire surface of griddle.
- Scrub surface of griddle using a woven abrasive pad. For safety and best results, use the **Griddle High Heat Squeegee** to firmly hold down the abrasive pad.

Step 4 - Remove Cleaner

- Squeegee excess food and oil into the grease trap.
- Use a clean, wet cloth to remove any remaining degreaser or oil from griddle surface.

Step 5 - Final Touch Up*

- Use the **MicroWipe™ 500 Microfiber Cloth** and spray or liquid degreaser to wipe off stainless steel front, edges and sides.
- Season clean griddle surface with light cooking oil. Spread oil with a clean **Griddle High Heat Squeegee.**

**Using microfiber on a hot surface may result in the microfiber melting.*
